

INLOHER

BENEFICIO DE CAFÉ INLOHER S. DE R.L.

We are INLOHER, we are sustainability, quality and traceability

Why are we unique?

We have a **multidisciplinary** team trained in each of the areas.

Efficient control system: The control and continuous improvement is the key to our system, it allows us to carry out traceability from the plant to the export, being flexible and dynamic to adapt to changes.

We have **high-tech machinery**, which allows us to preserve the quality and consistency of our coffees.

We work with the producer: Our more than 4000 producers are small families that rely on coffee as a way of life.

Sustainability: We are a first carbon neutral company in Honduras, the process has been long over 3 years of work, from the management of a forest plantation with sustainable practices to detailed records of our emissions.

Meet us!

Traceability

Quality

Sustainability

Our Story

Founded in 2009 thanks to the vision of a family and the subsequent union of a group of entrepreneurial coffee producers from Lepaera Lempira, Opalaca Region.

INLOHER, is a coffee mill dedicated to the processing, production and commercialization of high-quality coffee beans, complying with traceability and sustainability standards in the chain.

Since INLOHER was consolidated, it has directly impacted more than 200 coffee families directly through a solid social responsibility program and more than 4000 families indirectly.

Currently INLOHER has a great impact through the development of projects, technical assistance and financing of the crops for each producer.

Our Guiding Light

Mission

Accompany coffee producers in all production processes, committing ourselves to economic, social and environmental development in order to offer a high-quality product to the international market.

Vision

By 2024, INLOHER will position the Opalaca region in the world as a concept of origin; being a coffee exporter with guaranteed sustainability, quality and traceability.

Values:

Quality

Sustainability

Traceability

Reliability

Leadership

Honesty

Inclusion

Our reason for being

The producers

INLOHER committed with the sustainable production throughout the Honduran coffee production chain, has developed a technical advisory structure with experts on issues related to the cultivation of coffee with high quality standards, as well as a project platform that allows each producer improve the conditions of your farm.

The counseling is oriented on production issues, integrated pest management, good agricultural practices, soil management and conservation, management of agroforestry systems associated with coffee cultivation. The objective is to guarantee the quality of the bean from the coffee plant to its final destination, in this way traceability is fulfilled throughout the chain.

Our Certifications

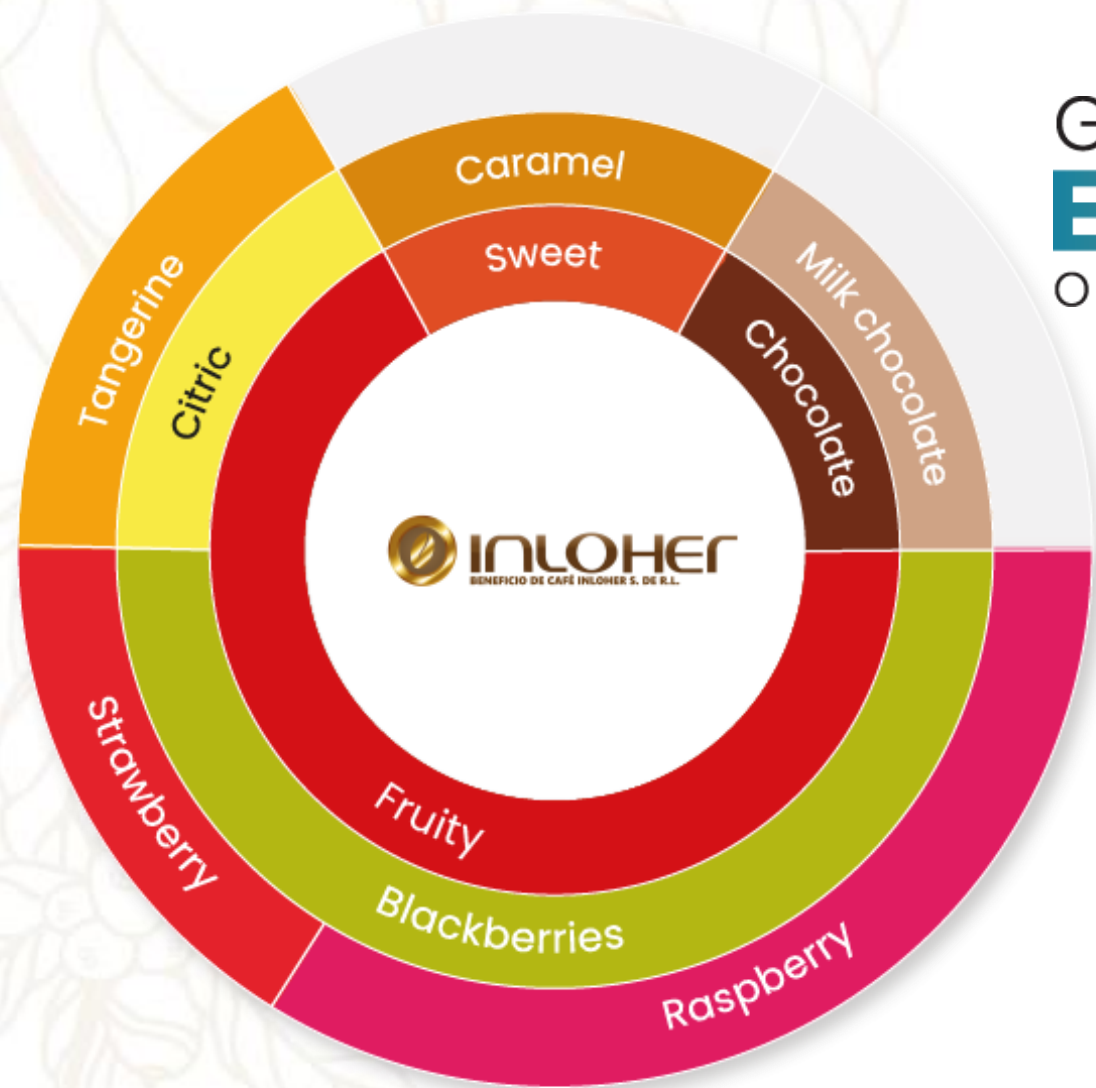

We are unique, Sustainability

Sustainability is a key element in INLOHER, the protection of our present resources taking care of the existence of future generations is key to our survival. That is why, knowing our emissions, INLOHER began in 2015 with a carbon offset program, which occurred in the first stage with the establishment of a forest plantation with four endemic species from Honduras, thus taking advantage of the maximum fixation potential carbon.

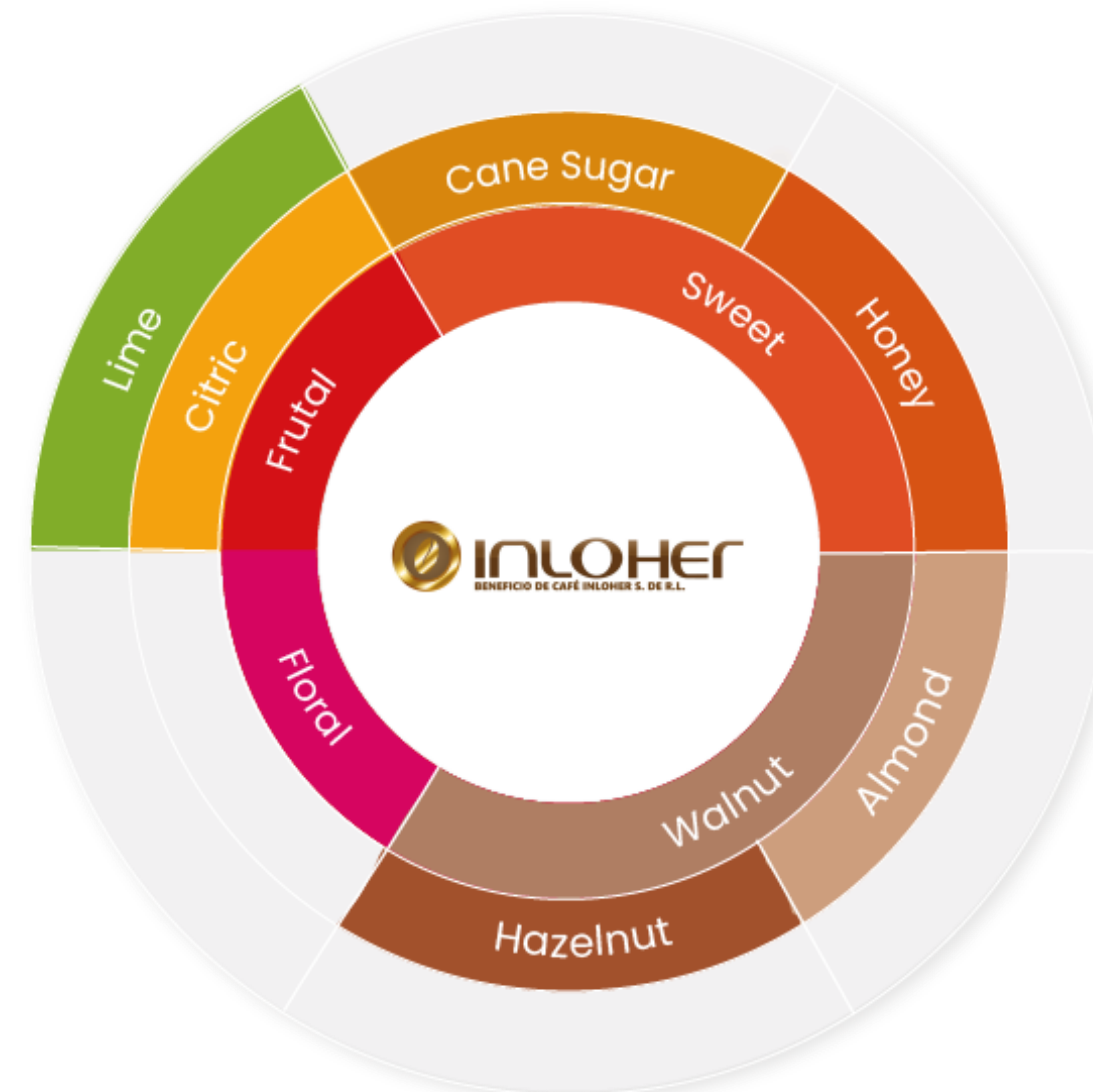

We are a first carbon neutral company in Honduras. Our vision of sustainability is to continue implementing efficiency plans in all operations.

Where we export

Guaranteed traceability

For INLOHER coffee benefit, traceability is the core to guarantee the quality and sustainability of the bean from the seed-plantation to the consumer.

Production:

Our team of agronomists with experience in the cultivation of coffee accompany all our producers in each stage of the cultivation until the processing plant that includes the harvest and post-harvest process.

Transformation:

We have a verification system in each process, production equipment with cutting edge technology, computer systems and technical personnel that guarantee the quality and monitoring of each grain in all stages of the transformation process.

Quality Control:

In our laboratory a physical and sensory analysis is carried out in order to know the quality of the coffee inside and outside the bean and thus guarantee a final product with the standards established by INLOHER

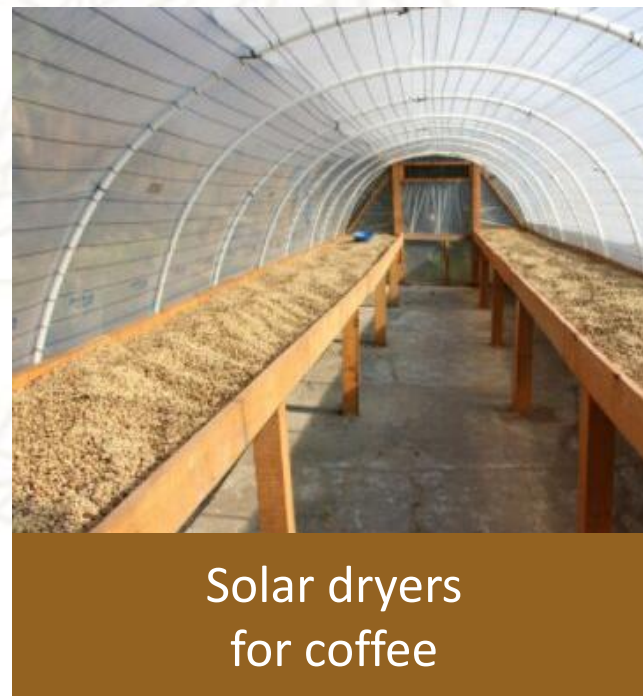

Export:

Export: Our experience has allowed us to develop a control system that allows us to guarantee quality until the destination.

Final Product:

We hope that anyone in the world who consumes our coffee has the guarantee of the quality and sustainability of the bean from production to its cup.

Desarrollamos Proyectos de Impacto

Strategical Alliances

Texas A&M University through the Norman Borlaug Institute - AgriLife. The project seeks to promote the adoption of coffee varieties resistant to rust and better adapted to extreme climates.

Currently we have research plots established in the field with INLOHER partner producers, these plots are part of a network of demonstrative trials at the Central American level.

UNIVERSIDAD
CATÓLICA

Cooperation agreement between INLOHER and the Catholic University of Honduras UNICAH, through which we join forces to develop study modules with experts on different topics such as coffee quality, marketing, economic empowerment and leadership. We hope in two years to be able to develop a full university career in coffee.

Our Foundation

We are a non-profit organization that was born in September 2018, we seek to strengthen the Honduran coffee sector through a management program that allows coffee producers to have access to better opportunities, one of our pillars is inclusion, generating empowerment of women through the development of projects and initiatives.

One of our purposes is also to create strategic alliances for the development of agro-productive projects in cooperation with companies and organizations, both national and international.

It will promote research, implementation of technology to counteract climate change throughout the coffee value chain.
